INVITATION

Dear Urosurgeon Colleagues,

Greetings from New Delhi,

Once again, here we are, more enthusiastic and rejuvenated to welcome you all for our 13th edition of PERCON at New Delhi, India with inclusion of several new features, ideas and topics of concern to all of us. Our previous TWELVE, highly academic but most practical Live Operative International Workshops so far on PCNL, named PERCON®, organized since 2004 onwards have received world wide appreciation and several of our urologist colleagues, were able to learn and master the art of PCNL merely by attending PERCON meeting with full sincerity.

PCNL has stood the test of time and has always won over its competitive techniques for management of renal and upper ureteric stones due to its inherent merits. It is regarded as undisputed Gold Standard surgical technique for all renal stones more than 2 cms in size quoted in all guidelines adopted by various urological societies.

Most of the urosurgeons encounter difficulty while making a successful track or get discouraged by excessive bleeding during and after PCNL. Both these problems are going to be discussed threadbare, during the conduct of PERCON 2026, over 2 days and practical demonstrations are aimed to show the ways to circumvent these problems.

"PERCON 2026", our 13th International Workshop dedicated to basics and advanced techniques of PCNL, will be held on 19th & 20st September 2026 at the same venue, in the 5 star comforts of HOTEL SURYAA, at New Friends colony, NEW DELHI, INDIA.

In this workshop, strong attention is paid to explain the basics anatomy relevant to PCNL surgery, which forms the foundation of proper understanding of its intricacies. Discussions are held to outline basic minimum investigations which are required for proper execution of precise surgical strike in any individual case. Panel discussions and symposium are held to discuss the ways to circumvent or minimize possible intra operative and post operative complications and their management. Live surgical demonstrations by National and International experts consolidates the theoretical learning and provides practical demonstration of various available techniques of PCNL.

Highlights of PERCON 2026 are going to be:-

1- How to plan and make the initial puncture and the track

2- Various uses of Artificial Intelligence in PCNL

3- Radiation free PCNL

A large exhibition of International and Indian instrument manufacturers will also be there at the venue. Exploring ancient to vibrant city of Delhi and a day tour to Agra to visit Tajmahal may add value to your visit.

FOR FURTHER DETAILS AND ON-LINE REGISTRATION, KINDLY VISIT OUR WEBSITE www.percon2026.com

An early registration is strongly recommended to avoid last minute inconveniences.

Wishing to see you there.

Regards,
